The perfect match... Classic Lighting's most popular Via Veneto series trimmed with the new spectacular Strass® Golden Teak crystal. 24% lead crystal columns, founts and bobeches are interspersed among heavy chased Spanish castings offered in six attractive finishes. See catalog 5005 pages 50-61 for more frame options and for Crystalique trim style.

Swarovski®, Spectra® and Strass® are registered trademarks of Swarovski AG.

Strass® Golden Teak crystal trim has been added to this series of heavy chased Spanish brass castings with 24% lead crystal columns and bobeches offered in four finishes. Crystalique Golden Teak non-lead crystal, although not as brilliant as SGT, provides a more economical option. See catalog 5005 pages 62-70 to see the complete collection in all the finishes and clear crystal trim options.

The play of light through the strands of clear glass beads evoke images of dew drops on the hand forged leaves and vines that adorn these wrought iron frames. A soft glow from the tea stained glass shades provides a warm effect with the natural bronze framework. Although the tapered branches, forged leaves and delicate hand painted finish portend an inordinate level of craftsmanship, these fixtures are within nearly anyone's budget.

With its rich Hand Rubbed Mahogany finish, the Eagle Pointe series will fit a wide range of decorative schemes. The soft cream colored glass has slightly darkened edges reminiscent of the days of old when a candle burning within the glass diffuser left a ring of soot at the top edge. From semi-flush to large foyer fixtures, the Eagle Pointe is sure to find a place in any traditional décor.

This fixture comes with all parts needed to convert from 40" high dining size to 48" high foyer size.

CAPE COD

One piece of matching Chain Decoration will be supplied with each hanging fixture. Additional pieces can be ordered using this part number.

The graceful flowing scroll work of these iron frames is showcased by the popular Oil Rubbed Bronze finish which highlights the soft curves of the ironwork including the fine finishing at the ends of the scrolls. The rounded tips that are brazed onto the scroll work make the Cape Cod series stand above the crowd of typical cheap pinched metal tubing that is so common in low end product. Attention to detail is the trademark of Classic Lighting.

All glass arm bowls shown on this page are easily convertible between the up or down position. This feature is particularly important when dealing with breakfast nooks or dining tables that require task lighting for reading newspapers or doing homework. In these cases the homeowner may prefer the lights to face down.

The Richland series is a melding of the linear/angular styling of Frank Lloyd Wright juxtaposed with the natural look of mica. While the linear framework appeals to our desire for order, the irregular glow of the almond mica shades tickles our mystical nature. Frank Lloyd Wright, born in Richland Center, Wisconsin certainly would have been drawn to the unique design of the Richland series.
